AutoCrib Announces 2016 Premier Distributors

Tustin, CA - [AutoCrib, Inc.](http://www.autocrib.com), provider of the broadest line of industrial vending machines and management software for automated inventory control, is pleased to announce their list of AutoCrib Premier Distributors for 2016.

Premier Distributors have demonstrated the ability to provide the highest level of solution design, inventory planning, replenishment services, and field support through a commitment towards continuing education and dedicated personnel.

"AutoCrib distributors represent us around the globe" states Steve Pixley, CEO. "And as AutoCrib is the most trusted name in industrial vending, they are an integral part of our brand. Our Premier distributors are providing a completely integrated turnkey solution: hardware, software, setup, training, service and support. We expect potential customers will reach out to them first because of their training, hands-on experience and deep expertise in the processes required to dramatically cut inventory costs in a variety of industrial environments."

These industrial distributors have not only designed and installed more AutoCrib systems than most distributors, but have made significant training investments in their personnel to ensure that customers receive superior service and rapid support for their AutoCrib systems. Due to their proven dedication to delivering excellence for their customers, they have rightfully earned the status of 'AutoCrib Premier Distributor'.

AutoCrib [www.autocrib.com] delivers automated inventory vending systems (software and machines) for manufacturing companies, airlines, military, retailers, distributors

and others who want to provide 24/7 unmanned access to inventory while maintaining complete control and 100% inventory accuracy. AutoCrib software provides real-time information on all inventory in the system from any computer, tablet or smartphone anywhere on the planet.

AutoCrib has been providing industrial vending solutions since 1994 and has deployed over 20,000 systems worldwide. AutoCrib's [product line](#) includes handheld scanners, automated lockers, traditional coil/helix machines, a PPE specific dispensing machine, RFID systems, vision based tool cabinets, as well as small and large robotic carousel systems with optional counting scale attachment. The systems can be managed by AutoCrib's powerful client/server software or its web-based application, AutoCrib.net.

AutoCrib's powerful software, which provides end-users with real time usage data and in many cases, updates their ERP systems. This allows manufacturers to dramatically reduce inventory costs by as much as 50% through increased accountability and tighter access control.
